Summary

AI Engineer with production experience building **enterprise AI and LLM platforms** at Cornerstone OnDemand. Experienced in designing **multi-tenant LLM gateways, AWS Bedrock integrations, model routing, AI governance, PII protection, and LLM evaluation pipelines**. Strong backend and systems background across **Python, FastAPI, Kubernetes, event-driven architectures, RAG**, and cloud infrastructure, with hands-on experience delivering secure, scalable, and production-ready AI systems.

Education

Amrita Vishwa Vidyapeetham

Oct 2021 – Aug 2025

Bachelor of Technology in Electrical and Computer Engineering

CGPA: 8.6 / 10.0

Narayana Junior College

95.4%

Intermediate (MPC)

Technical Skills

- **LLM & AI:** AWS Bedrock, Large Language Models, LLM Guardrails, Model Routing & Onboarding, PII Anonymization, Prompt Engineering, RAG, LLM Evaluation (DeepEval, MLflow), AWS TEI, GPT Researcher, HeyGen, Docling, LangChain
- **Backend & Systems:** Python, FastAPI, AsyncIO, Pydantic, Rate Limiting, REST API Design, Microservices, Apache Pulsar, ClickHouse, Event-driven Architecture
- **Security & Governance:** JWT, JWKS, Tenant Management, PII Protection, CVE Remediation, Twistlock, BlackDuck
- **Infrastructure & DevOps:** Kubernetes, Helm, Docker, AWS EKS, Amazon ECR, AWS SSM, Terraform, GPU/CUDA
- **Observability:** Splunk, New Relic APM, Prometheus, Grafana

Experience

Associate AI Engineer

Apr 2026 – Present

Cornerstone OnDemand, Hyderabad

- Contributed to the evolution of a centralized **AI Gateway and LLM Platform**, enabling secure, governed, and multi-tenant access to enterprise GenAI workloads on AWS Bedrock.
- Engineered **AI governance and safety controls** using AWS Bedrock Guardrails and prompt-based guardrails, alongside **PII anonymization/deanonymization** with fail-open resiliency to maintain request availability during downstream service failures.
- Implemented **tenant-aware rate limiting, usage quotas, and access controls**, hardening multi-tenant security through JWT/JWKS validation, 24-hour Caffeine caching, tenant whitelisting, and controlled Galaxy bypass for approved tenants.
- Integrated **Claude Haiku 4.5, Sonnet 4.6, and Sonnet 5.0** on AWS Bedrock with SSM-driven hot-reloadable model routing, enabling **zero-downtime model onboarding without pod restarts**.
- Led the **GCP → AWS TEI embedding infrastructure migration**, owning Helm chart development and deployment across environments; resolved **CUDA compute capability mismatch (CC75 → CC86)** on A10G instances, eliminating CrashLoopBackOff failures in embedding worker pods.
- Remediated **8+ CVEs** identified through Twistlock and BlackDuck scans, upgrading vulnerable dependencies across cryptography, PyJWT, setuptools, and pip.

Junior Software Engineer – AI / Platform Engineering

May 2025 – Apr 2026

Cornerstone OnDemand, Hyderabad

- Engineered **LLM evaluation pipelines** using DeepEval and MLflow for automated accuracy, safety, and rubric-based scoring of AI workloads.
- Developed an automated **AI content generation pipeline** integrating GPT Researcher and HeyGen, transforming research topics into structured video content end-to-end.
- Designed **document processing services** using Docling with pluggable fixed, semantic, and recursive chunking strategies to support enterprise RAG pipelines.
- Developed an **event-driven gamification engine** on Apache Pulsar, processing real-time user events and

incrementally awarding XP and badges.

- Implemented **end-to-end application observability** using Splunk, New Relic APM, Prometheus, and Grafana for centralized logs, distributed traces, metrics, and dashboards.

Back End Developer Intern

Dec 2024 – Mar 2025

B Commune, Hyderabad (Hybrid)

- Developed the **job posting and application backend** using FastAPI, supporting the complete listing-to-application workflow.
- Developed **user profile APIs** supporting skills, experience, and opportunity discovery features.
- Implemented a **RAG-powered candidate search system** mapping natural-language recruiter queries to ranked candidate results.
